

MOSAIRUL ALAM TYHAN

Aspiring Machine Learning Engineer

☎ +8801406822246 ✉ tyhanhasan@gmail.com 🌐 mosairulalamtyhan 🌐 Website 📍 Mymensingh, Bangladesh

PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer with hands-on experience developing and deploying end-to-end ML applications using Python, Scikit-learn, TensorFlow, FastAPI, and Streamlit. Built NLP and recommendation systems involving 120K+ text records and 500K+ movie titles, with experience in model development, REST APIs, and deployment.

EXPERIENCE

Machine Learning Intern | Internship

Jul 2026 - Present

FlyRank

Remote • United States

Contributing to real-world machine learning projects involving data preprocessing, model development, and testing in a collaborative team environment.

TECHNICAL SKILLS

Languages : Python, SQL

ML/DL : Scikit-learn, TensorFlow, Keras, Numpy, Pandas

Backend & Deployment : FastAPI, Docker, Streamlit, Uvicorn, REST APIs, Streamlit Community Cloud, Render

Tools & Database : Git, GitHub, Jupyter, Kaggle, MySQL

ML Areas : NLP, Deep Learning, Model Deployment

PROJECTS

NewsCortex AI | 🌐 Github 🌐 Website

May 2026 - Present

- Built an NLP-based news classification system using TF-IDF, TensorFlow/Keras, and ANN (Deep Learning).
- Processed 120K+ articles across 4 categories with 10K TF-IDF features using unigram/bigram representations.
- Achieved 91% test accuracy and built a FastAPI backend, Dockerized the application, and deployed a Streamlit frontend for real-time predictions.

CineMatch AI | 🌐 Github 🌐 Website

Apr 2026 - Present

- Built a content-based movie recommendation system using TF-IDF and Cosine Similarity across 500K+ movie titles.
- Developed 5+ REST API endpoints with FastAPI and integrated real-time movie data for dynamic recommendations.
- Dockerized and deployed the application with FastAPI and Streamlit, enabling real-time movie search and personalized recommendations.

Heart Disease Risk Predictor | 🌐 Github 🌐 Website

Jun 2026 - Sep 2026

- Built a heart disease risk prediction system using Logistic Regression for binary classification.
- Developed a FastAPI REST API with Pydantic validation for real-time risk prediction and probability scores.
- Dockerized and deployed the application with a Streamlit frontend, including feature-importance visualization and error handling.

EDUCATION

Mymensingh Polytechnic Institute | Mymensingh , Bangladesh

Dec 2023 - Dec 2027

Diploma in Engineering, Computer Science & Technology

CURRENT CGPA : 3.94 / 4

CERTIFICATION

Data Science & Machine Learning with Python

Ostad

LANGUAGES

- Bangla (Native)
- English (Working Proficiency)
